Surgical and Aesthetic Laser Service

Our technicians are experienced in the preventive maintenance and service of a wide range of Surgical and Aesthetic Lasers to include: CO₂, Argon, Nd: Yag, Slit Lamps and KTP. Our preventive maintenance service is our most popular.

Benefits of a consistent preventive maintenance (PM) program:

- Save on costly, unplanned laser repairs and lengthy downtime.
- Reduce the risk of potential equipment related injuries to your patients.
- All service is documented and tracked.

IDI performs a PM on an annual basis. Many manufacturers highly recommend a bi-annual laser PM, the choice is yours. If you are interested in saving your facility money, please contact us, we will be happy to provide a quotation.
